Acknowledgements

Thank you to the agencies and individuals who contributed their time, expertise, and other resources to conduct the 2014 Point-in-Time (PIT) Count of sheltered and unsheltered homeless. The City & County of Honolulu, State of Hawaii, Department of Human Services, Homeless Programs Office, Partners in Care¹, and Bridging the Gap would like to recognize the following people, organizations, and public and private agencies for participating in this project:

PIT Count Planning Members

- Lori Tshako – State of Hawaii, Department of Human Services, Homeless Programs Office
- Paul Ruddell - State of Hawaii, Department of Human Services, Homeless Programs Office
- Gabe Naeole – City & County of Honolulu, Department of Community Services
- Michael Ullman – U.S. Vets, special thank you to Michael for his help with planning, instructions, and training for this year’s count.
- Tien Lum – Hybrid International, LLC, special thank you to Hybrid for making the adjustments to the HMIS PIT module in accordance with HUD requirements
- Carlos Peraro – C. Peraro Consulting, LLC

Bridging the Gap CoC PIT Planning Members

- Rita Sandi-Palma, Chair – Community Alliance Partners (Big Island Chapter of BTG)
- Jeremy McComber – HOPE Services Hawaii
- Carol Matayoshi – HOPE Services Hawaii
- Debra deLuis, Chair – Kauai Community Alliance (Kauai Chapter of BTG)
- Trink Martin – KEO
- Stephanie Fernandes - KEO
- Sharon Woodward– Kauai Housing Agency
- Maude Cumming, Chair – Maui Homeless Alliance (Maui Chapter of BTG)
- Jan Shishido and Tina Krau – Maui County Department of Housing and Human Concerns

Partners In Care CoC PIT Planning Members

- Kalihi Palama Health Center, Jennifer Tehotu, Leslie Uyehara, Aaron Whyne, Marian Bernardino, Elizabeth Anderson
- IHS, Connie Mitchell, Kanui Bell, Justin Smith, Tyran Terada
- Project Date, Skye Moore
- Mental Health Kokua, Adrian Contreras
- Steadfast Housing Development Corporation, Coralee Chin
- Waikiki Health, Joy Rucker, Michelle Ip
- Catholic Charities Hawaii, Erin Rutherford, Paul Oshiro
- USVETS, Gladys Peraro, Kim Cook, John Molina, Steven Williams, Macy Sevaatasi
- Waianae Community Outreach, Tanya Tehotu, Faleupolu Toa

¹ Partners in Care is a membership organization of homeless service providers, other professionals, units of local and state government, service utilizers, and other community representatives located on Oahu, Hawaii. PIC is a planning, coordinating, and advocacy body that develop recommendations for programs and services to fill gaps in Oahu’s Continuum of Care for homeless persons.

- Weinberg Village Waimanalo, Holly Holowach
- DHS, Homeless Programs Office, Paul Ruddell
- Waianae Coast Comprehensive Health Center, Leina Kanana, Kanoa Pagaduan, Kahea Poe
- Alternative Structures International, Ana Piloton
- Gregory House Programs, Seng Lee
- Hale Kipa, Deborah Smith, Alike Campbell
- Hawaii Job Corps, Bob Starkman
- Helping Hands Hawaii
- Hoomau Ke Ola
- KA PAALANA
- Salvation Army
- University of Hawaii at Manoa
- Windward Homeless Coalition

A special mahalo to the numerous individuals and organizations who donated gifts for persons and families experiencing homelessness that were distributed during the Point-in-Time Count and to the many volunteers that helped coordinate and carry out the interviews and count.

Background and Project Overview

The U.S. Department of Housing and Urban Development's (HUD) annual grant application for Continuum of Care (CoC) Homeless Assistance Programs funding requires the Honolulu and Balance of State Continua to produce "statistically reliable, unduplicated counts or estimates of homeless persons in sheltered and unsheltered locations on a one-day point in time." The 2014 Statewide PIT Count date was January 22nd, 2014.

The City & County of Honolulu, Department of Community Services (DCS), the State of Hawaii, Department of Human Services (DHS), Homeless Programs Office, Bridging the Gap CoC, and Partners in Care CoC collaborated to develop the methodology for the count and worked diligently with homeless service providers to plan the logistics and develop the survey instruments in accordance with HUD's guidelines.

Objectives

The objective of the 2014 PIT Count was to obtain an accurate estimate of Hawaii's sheltered and unsheltered homeless populations on January 22, 2014 in conjunction with:

- Obtaining an overall count of homeless individuals and households in specific subpopulations throughout Oahu, Maui, Kauai, and Hawaii;
- Obtaining an estimate of the number of homeless singles and persons in households with children;
- Obtaining an estimate of the number of chronically homeless individuals and families according to HUD's definition of chronically homeless.

As in the 2013 PIT Count, the State of Hawaii's Homeless Management Information System (HMIS) was utilized to extract data for both the sheltered and unsheltered counts. The HMIS is a statewide database that was established in 2002 for recording homeless client and service data in an accurate and uniform manner in order to track program outputs and outcomes for reporting and funding purposes. All homeless service providers receiving funding at the federal, state, or local level are required to participate in the HMIS. Some privately funded agencies voluntarily use the HMIS, which is highly encouraged.

The State received HUD's permission to deviate from the conventional one-night unsheltered PIT Count methodology and to instead conduct a seven-day physical count from Thursday, January 23, 2014 to Wednesday, January 29, 2014. These dates fell within the last ten days of January 2014 as mandated by HUD. All unsheltered persons encountered by field staff were asked "Where did you sleep this past Tuesday, January 22nd?" as well as other survey questions. The surveys used are attached as appendices three and four.

The unsheltered homeless count used survey instruments based on criteria from HUD's *Guide to Counting Unsheltered Homeless* for use by field staff to document unsheltered responses. The surveys for unsheltered persons on the night of January 22, 2014 were entered into the PIT Count module of the HMIS, which has response fields for all of the survey questions. The surveyed participant's name was searched for in the HMIS to determine whether the person had ever been

entered into the HMIS database. Surveyed respondents existing in the HMIS had some of their demographic information populated by corresponding response fields to streamline the data entry process in the PIT module. Staff performing data entry could edit the populated fields if information was not current. After all surveys were entered into the PIT module, the data were analyzed to obtain the statistics needed by HUD and referenced in this report.

The following unsheltered encounters were not included in the unsheltered homeless count: 1) persons who stated that they had been sheltered on the night of January 22, 2014, 2) persons who were approached to complete a survey, but indicated that they had already been surveyed and 3) persons who did not indicate where they had slept on January 22, 2014, 4) Surveys with little or no information.

The vast majority of sheltered homeless statistics were derived from HMIS client and intake data. Emergency, transitional, and safe haven programs were contacted prior to 1/22/14 and instructed that all clients sleeping in their facility on the night of the count needed to have active intakes in the HMIS. Agencies were advised to make sure that all client data were current so that subpopulation data could be as reliable as possible. Follow-up with specific service providers was also conducted to verify that HMIS listings matched the nightly census. Shelters not participating in the HMIS (e.g. DV shelters) were contacted individually to provide the number of homeless individuals and families residing at their shelters on the night of the count, in addition to providing specific subpopulation data.

PIT planning meetings were conducted several times in the month leading up to the count and were attended by staff from HUD, the City, State, PIT Team Coordinators; homeless service providers, and interested CoC members. The purpose of these meetings was to refine the count's methodology, provide instructions, and obtain feedback regarding the survey instruments used for the unsheltered counts.

Separate trainings took place for field staff conducting the unsheltered PIT. These trainings provided an overview of the purpose and methodology for the PIT, safety tips, recommended materials to bring during the field work, and practice regarding the use of the survey instruments. Additionally, PIT Team Coordinators provided training in the field before the count to ensure that all volunteers understood how to use the survey. The PIT materials provided to surveyors are displayed in appendices five through nine.

Point-in-Time Count Teams

PIT teams were composed of outreach workers from service agencies that regularly perform outreach to unsheltered individuals and families experiencing homelessness. Teams were assigned to a region where they regularly provide outreach services so field staff could use their familiarity with the region to ensure all of the areas frequented by unsheltered homeless populations were surveyed. Because outreach workers had established rapport with many of the consumers they encountered, consumers were more likely to participate in the surveys and provide accurate information. Feeding programs were also covered during the PIT to reach additional unsheltered persons.

Oahu Regions:

1. Downtown Honolulu: Salt Lake to Piikoi Street;
2. East Honolulu: Piikoi Street to Hawaii Kai, including Waikiki;
3. Ewa: Aiea to Kapolei;
4. Kaneohe to Waimanalo;
5. Wahiawa to North Shore;
6. Upper Windward: Kahaluu to Kahuku; and
7. Waianae Coast.

Maui Regions:

1. Central Maui
2. Lower Waiehu
3. Up Country
4. Lahaina
5. Kihei
6. Hana

Kauai Regions:

1. West
2. South
3. South Central
4. East
5. North

Hawaii Regions:

1. Kohala
2. Honokaa
3. Laupahoehoe
4. Hilo
5. Waiakea
6. Keaau
7. Pahoa
8. Kau
9. Konawaena
10. Kealakehe

Implementation

The sheltered count was conducted on the evening of 1/22/14, while the unsheltered surveying took place from 1/23/14 to 1/29/14. A “Super Thursday” unsheltered count was conducted with all participating agencies on the night of 1/23/14, aimed at reaching and surveying as many unsheltered homeless as possible. For the subsequent six days, each outreach agency and complement of volunteers independently scheduled days and times when field staff would visit known sites, balancing safety with timing in an effort to maximize the number of unsheltered persons counted.

While the 2005 and 2007 field counts used a sampling method to survey the encountered homeless, the 2009-2014 methodology required that all unsheltered persons identified be asked to complete a survey. Service providers agreed this was the best way to get an accurate count of homeless persons and an improved chronically homeless and subpopulation tally. This also allowed field staff to obtain identifying info for each person being counted so that the surveyed could be unduplicated. Unduplicating the data is important to ensure clients or families that mistakenly appear multiple times in the counts are only counted once. The duration of the count was increased so that outreach teams would be able to survey each person encountered and to give field staff more time to reach as many unsheltered persons as possible.

Overview for the 2014 Point-In-Time Count

On 1/22/14 both Continuums of Care conducted Point-In-Time Count (PIT) of homeless persons on Oahu, Maui, Kauai, and Hawaii. The sheltered count on 1/22/14 preceded a seven-day unsheltered count of homeless persons that took place from 1/23/14 to 1/29/14. The seven day count was condensed to estimate the total number of unsheltered homeless based on survey responses for the night of 1/22/14. This data was combined and unduplicated with sheltered data amassed via the HMIS and manual survey data to produce an estimate of the total number of homeless throughout Hawaii as of 1/22/14.

Exhibit 1a summarizes the Oahu PIT for 2013 & 2014. The sheltered count includes persons staying in emergency, transitional, or safe haven programs on the night of 1/22/14. The total number of homeless on the island of Oahu was estimated to be 4,712. There were 3,079 sheltered homeless and 1,633 unsheltered homeless, representing 65% and 35% of the homeless population respectively. Individuals are defined to be singles or multi-adult household members (e.g. couples).

Roughly 30% of sheltered homeless were individuals, while the remaining 70% were persons in families. Persons in families were defined as members of a household with at least one adult and one child under the age of 18. 88% of the unsheltered homeless were individuals while 12% were persons in families. The vast majority of the increase from 2013 to 2014 resulted from a larger number of individuals being surveyed in 2014.

Exhibit 1a – 2013 & 2014 Oahu Homeless Composition				
	2013 Homeless	2013 % of Total	2014 Homeless	2014 % of Total
Total People				
Sheltered	3,091	67.8%	3,079	65.34%
Unsheltered	1,465	32.2%	1,633	34.66%
Total	4,556	100.0%	4,712	100.00%
Individuals				
Sheltered	901	41.0%	911	38.67%
Unsheltered	1,295	59.0%	1,445	61.33%
Total	2,196	100.0%	2,356	100.00%
People in Families				
Sheltered	2,190	92.8%	2,168	92.02%

Sheltered	525	92.4%	526	91.00%
Unsheltered	43	7.6%	52	9.00%
Total	568	100.0%	578	100.00%

Exhibit 1b summarizes the rural county homeless composition. The total number of homeless for 2014 was estimated to be 2,206, which rose 24% from the prior year. Sheltered homeless represented 33% of the total, while unsheltered comprised 67%. Both exhibits show the

disparity in the percentage of sheltered/unsheltered homeless relative to the total number of homeless between the two CoCs. In the below, 34% of the sheltered were individuals, while the remaining 66% were persons in families. 78% of the unsheltered were individuals while 22% were persons in families, showing a larger proportion of homeless family individuals for the rural counties. Exhibit 1b also shows a dramatic increase in the number of unsheltered individuals and persons in families. Whether the increase is attributable to better execution or higher actual numbers of homeless is unclear and cannot be determined without further analysis of HMIS data, which is beyond the scope of this report.

Exhibit 1b – 2013 & 2014 Rural Counties Homeless Composition				
	2013 Homeless	2013 % of Total	2014 Homeless	2014 % of Total
Total People				
Sheltered	654	36.8%	734	33.27%

Total	936	599	566	617	557	869	56.01%

The number of sheltered homeless on Oahu decreased slightly over the last year, but has remained nearly flat over the last three years. From 2013 to 2014 there was less than a one percent decrease in the total number of sheltered homeless. All three of the rural counties saw increases in the number of sheltered homeless relative to 2013. Actual numbers for all emergency, transitional, and safe haven programs throughout Hawaii are detailed in appendix one. Unsheltered homeless also increased across each of the four islands presented in the exhibits above. Again, it is difficult to ascertain whether the increase was due to improved execution or new homeless, however, anecdotal evidence from personnel points to better canvassing efforts and improved training and execution within particular regions.

Statewide Sheltered Homeless Summary, 2009-2014

Exhibit 3 summarizes the sheltered homeless over the last six years. The statewide sheltered figure increased slightly when compared to 2013, with the increase largely attributable to the rural counties. Hawaii had the largest percentage increase over the last year. The total number of households with children decreased by 23 families; however the number of persons in those families increased slightly. It is also important to point out improved shelter utilization among the rural counties when compared to the prior year.

Sheltered Homeless Demographic Characteristics

Exhibit 4a outlines demographic data for HMIS participating adult individuals in emergency, transitional, and safe haven programs on Oahu. (A Safe Haven is a form of supportive housing that serves hard-to-reach homeless people with severe mental illness who are on the streets and have been unable or unwilling to participate in supportive services.) The emergency data is taken from a sample of 325 adults; the transitional from a sample of 537 adults; and the safe haven from a sample of 25 adults. Non-HMIS data accounting for 24 adult individuals are not included in this Exhibit 6 because the manual survey does not ask for this demographic data.

The below displays gender, ethnicity, racial, age, vet status and employment descriptive statistics for adult individuals enumerated during 2014. Males outnumber females in emergency and transitional programs types over two to one. The vast ethnic majority in all types is non-Hispanic/Latino, and in emergency and transitional types, the majority self-identify as Caucasian/White, with the next highest race being Hawaiian/Pacific Islander. 14% of emergency clients are employed part or full time, while for transitional, one out of every four clients is employed part or full time.

The Homeless Service Utilization Report analyzes HMIS data and presents demographic information about people who are receiving homeless services funded through government contracts. The report is prepared by the Center on the Family at the University of Hawaii in conjunction with the Homeless Programs Office of the Hawaii Department of Human Services (DHS). It can be downloaded from the site: <http://uhfamily.hawaii.edu/>

Exhibit 4b presents demographic data for HMIS participating adult individuals in emergency and transitional programs on the rural counties. As outlined above, non-HMIS survey data are excluded from the table below as the manual survey does not break out the data into the format below. Total adult individuals in the HMIS accounted for 237 of the total sheltered homeless in the rural counties. Various demographic characteristics based on HMIS data are presented below.

Homeless Subpopulations Data

The 2014 PIT provides estimates for the number of unaccompanied homeless and families that are chronically homeless according to HUD’s current definition. Data collected during the count also provide estimates for various subpopulation data including: 1) veterans, 2) severely mentally ill, 3) chronic substance abusers, 4) HIV/AIDS, 5) victims of domestic violence for sheltered homeless, and 5) unaccompanied youth.

In 2014, the CoC was required to collect sheltered subpopulation information in eight different areas, and unsheltered subpopulation data in seven. Exhibit 3 shows the estimated number of homeless people or families with certain characteristics. Sheltered data was amassed from emergency, transitional, and safe haven data from programs on Oahu or the rural counties. Non-HMIS data contributes mainly to the DV line in the below table, and made small contributions to the other statistics. The primary source for the below data was the HMIS.

It is important to note that as the CoC tightens many aspects of data quality, the disabling condition field on the intake will be the sole variable used to determine disability for the chronically homeless calculation generating the statistics for the PIT data. This is why it is imperative to obtain as accurate information as possible for this key field.

*DV derived from sheltered data only

In Exhibits 5a & 5b, the number of sheltered chronically homeless was taken from either emergency or safe haven programs. The total number on Oahu fell dramatically from 2013, which could use further investigation, but begs questions about the validity of both the disability and length criteria data for emergency providers serving single populations. The number of unsheltered chronic homelessness increased by 53 and 92 for Oahu and the rural counties respectively. A further breakdown of the unsheltered CH number can be referenced in Exhibit 9 and Appendix 2 of this report. It is also important to note that the total sample used to calculate the CH number rose for both CoC.

Unsheltered subpopulation data is self-reported through interviews during the week of the count. This is one explanation for why there are variations in the data from year to year. Another is lack of consistent execution from year to year. In 2014, the number of people surveyed increased significantly when compared to 2009-2013, which resulted in higher numbers for important subpopulation fields. This is also why it is important for outreach teams familiar with specific regions and clients, to do as much surveying in the week of the count as possible. Outreach teams are familiar with clients and will obtain much more accurate information than volunteers for some of the reticent, hard-to-serve population.

Unsheltered data for people with severe mental illness, chronic substance abuse, and HIV was not required by HUD to be reported prior to 2013. It should also be noted that corroboration of unsheltered data with intake records of clients or assessment records was beyond the scope of this project but would be ideal to obtain more accurate estimates.

The increase in unsheltered CH is largely attributable to the jump in total single persons encountered and used in the final count. As the execution of the count continues to improve and the numbers surveyed continue to increase, it seems reasonable to assume that the total number of CH will also trend upward, as past data has indicated. This is also why it is imperative to use the PIT week to canvass Oahu and the rural counties as thoroughly as possible. This will give the CoC the best chance to obtain reliable baseline metrics on many of the data elements used in this report. This will also help to determine if new programs and initiatives are an effective use of resources.

Statewide Unsheltered Homeless

The total number of unsheltered homeless was based on persons encountered during the seven-day count stating that they were unsheltered on the night of 1/22/14. People included in the count were surveyed and usually provided unique identifying information that could be used to unduplicate survey records and perform other detailed analysis with unsheltered HMIS data. Persons congregating in places known to have homeless persons but who indicated that they were sheltered on the night of the count were not included in the count.

Unsheltered persons known to outreach workers but who were not present at the sites during the count were not included in the total unsheltered number. Outreach workers were also aware of persons residing in specific locations in mountains, caves, and bushes but determined, based on experience, that it was unsafe to reach persons in these areas. Since these persons could not be surveyed, they were not included in the count.

The 2014 summary of unsheltered homeless persons is shown in Exhibits 6a-d. The PIT estimate of unsheltered homeless on Oahu was 1,633. 188 persons were part of the 52 households with children identified during the count. The remaining 1,445 persons were either single or groups of adults (usually couples). 1,327 were single persons, while 118 were part of multi adult households, which were usually couples.

The PIT estimates for each of the rural counties are also shown. Throughout these counties there were increases in the total number of unsheltered homeless, with a dramatic 65% increase on the island of Hawaii.

Hawaii's regional distribution for 2013 was adjusted for areas nine and ten to account for better delineation of the regions. The numbers have been aligned with 2014 data and are comparable. 2012 data are not comparable with the Hawaii County regions Hawaii utilized for 2013 and 2014 counts.

Demographic Characteristics of the Unsheltered Adult Population

Exhibits 8a-b displays demographic characteristics of the adult unsheltered population from the 2014 count. The table is divided to reflect the difference between adult individuals and adults in families. The Oahu data also includes unaccompanied youth found during the count.

Unsheltered Chronically Homeless

Chronic homeless analysis used survey data to identify unsheltered chronically homeless individuals and families using HUD's definitions. The estimated number of unsheltered chronically homeless individuals statewide is shown in Exhibits 9a-d. 2012 & 2013 data are also presented to compare how the data has changed over the last two years.

The exhibits below display the overall change in the number of chronically homeless individuals over the last three counts for each of the four islands. The denominators used in the percent chronic calculation reflect the total cohort of unsheltered singles in both years. Members of families and couples have been excluded to adhere to HUD's definition of a chronically homeless individual.

Total numbers of chronically homeless increased for each of the islands, but again, it remains difficult to gauge the extent of the change until the count is executed to its potential. Improved execution each year will likely continue to drive the numbers upward. Guidance and instructions for improved execution have been detailed in the appendix, and steps to improve data quality have been addressed through analysis by Ullman and Peraro.

Recommendations for Future PIT Counts

Overall the count coverage and many of the fields included in this report improved over last year and prior years. As training and execution improve, so will the count.

There are several key recommendations for future PIT counts:

- 1) Homeless outreach organizations should do their best to utilize recommendations and instructions in PIT analysis and instructions included in appendices of this report. Active listings should be refined based on the recommendations and essentially used as the listing of clients to find during the weeklong canvassing effort.
- 2) It continues to be suggested that the PIT week be used exclusively for the PIT count. It is recommended that all State funded outreach programs use the week to survey as many of their clients as possible, with other organizations and volunteers contributing support and being used methodically and strategically based on deficiencies in prior areas.
- 3) Begin planning for the PIT count months in advance in order to galvanize support and coordinate team leadership with partners. This will also reduce duplication and overlap and ensure that much of the island is canvassed effectively. PIC and BTG Planning and Data Committee members should be united in the planning effort and conveying needs and expectations to respective general membership and the executive teams.
- 4) Use skilled data entry personnel to enter survey data from the PIT count. Many errors continue to appear in the analysis, which make it difficult to assess certain aspects of the data or prolong the time it takes to produce the report.
- 5) Use the HMIS search functionality effectively. This will contribute to higher data quality and improve the ability to link data to regular HMIS data or from year to year. The CoC Data Quality Plan elaborates on how to search the HMIS effectively and will be included in the instructions for next year. A random sample of 20 clients yielded roughly 33% who had been in the system yet were identified as new clients on Oahu.

Appendix 3: 2014 PIT Count Household Survey

USE THIS FORM IF THE CLIENT IS IN A **HOUSEHOLD (Accompanied)**

2014 City & County of Honolulu Homeless Point-in-Time Count Survey

Interviewer's Name: _____ Agency/Group: _____

Site of Interview (Actual Location): _____ Date: _____

**"Are you living alone or with others?"
(If living alone use SINGLE form)**

"Where did you sleep this past Wednesday, JANUARY 22nd?" _____
SPECIFIC LOCATION - If answer is sheltered (e.g. house, shelter, hospital, jail), END SURVEY.

"What area of the island did you sleep?" _____
Enter Area/Region # (1-7) [Map on back]

HEAD OF HOUSEHOLD:

1. How many ADULTS are in your household? _____ How many CHILDREN UNDER 18? _____
2. First Name: _____ Last Name: _____
3. Date of Birth: _____ / _____ / _____ OR if DOB refused, Age: _____
4. Gender: Male Female Transgender Unknown/Refused
5. Do you identify as Hispanic (Ethnicity)? Yes No Unknown Refused
6. What Race do you most identify with? **(SELECT ONLY ONE)**
 White Black/African-American Asian American Indian/Alaska Native
 Native Hawaiian Other Pacific Islander Multiple Races Unknown
7. Have you served in the U.S. Armed Forces? Yes No Unknown Refused
IF NO, SKIP to Q9
8. Were you activated, into active duty, as a National Guard member or Reservist?
 Yes No Unknown Refused
9. How long have you been continuously homeless this time?
 Less than 1 year **1 year or longer*** Unknown Refused
10. How many times have you been homeless in the past 3 years?
 1-3 times **4 or more times*** Unknown Refused
11. Were you on the street, beach, park, or in an emergency shelter each time?
 Yes* No Unknown Refused
12. Do you have a mental health disability that limits your ability to work or perform activities of daily living?
 Yes* No Unknown Refused

13. Do you have an alcohol or drug problem that limits your ability to work or perform activities of daily living? Yes* No Unknown Refused

14. Are you currently living with HIV/AIDS? Yes* No Unknown Refused

15. Do you have a physical, developmental, or other disability that limits your ability to work or perform activities of daily living? Yes* No Unknown Refused

Encampment Portion on Back

The following descriptions should be completed based on a visual but not intrusive inspection of the encampment area where the client is living unsheltered. Clients may complete themselves in office.

1. **ENCAMPMENT DESCRIPTION:** On-site Visual Office Setting Unable to complete

2. **APPROXIMATE SIZE OF ENCAMPMENT: (SELECT ONLY ONE)**

6'x6' or smaller Up to 12'x12' Larger than 12'x12' Undetermined

3. **IS SLEEPING AREA COVERED FROM RAIN?** Yes No Undetermined

4. **WHAT MATERIALS ARE USED TO CONSTRUCT OR SUPPORT ENCAMPMENT?**

(Select as many as applicable)

a. Vinyl Tarp(s) b. Tent(s) c. Corrugated Boxes d. Crates

e. Shopping Cart f. Sleeping Bag g. Bicycle(s) h. Vehicle(s)

i. Furniture j. Carpeting k. Plastic Bags l. Construction materials

Other: _____

5. **ANIMALS?** Yes; Type/#: _____ No Unknown

6. **ACCESSIBILITY?** Easy (street/park) Moderate (off- path) Difficult (dangerous)

7. **SINGLE PERSON ENCAMPMENT?** 1 Person Multiple Persons Undetermined

CHECK WHEN ALL HOUSEHOLD SURVEYS HAVE BEEN ENTERED INTO THE HMIS

Description of Person if Refused Survey:

OTHER ADULT IN HOUSEHOLD:

1. First Name: _____ Last Name: _____
2. Date of Birth: _____ / _____ / _____ OR if DOB refused, Age: _____
3. Gender: Male Female Transgender Unknown/Refused
4. Do you identify as Hispanic (Ethnicity)? Yes No Unknown Refused
5. What Race do you most identify with? **(SELECT ONLY ONE)**
 White Black/African-American Asian American Indian/Alaska Native
 Native Hawaiian Other Pacific Islander Multiple Races Unknown
6. Have you served in the U.S. Armed Forces? Yes No Unknown Refused
IF NO, SKIP to Q8
7. Were you activated, into active duty, as a National Guard member or Reservist?
 Yes No Unknown Refused
8. How long have you been continuously homeless this time?
 Less than 1 year **1 year or longer*** Unknown Refused
9. How many times have you been homeless in the past 3 years?
 1–3 times **4 or more times*** Unknown Refused
10. Were you on the street, beach, park, or in an emergency shelter each time?
 Yes* No Unknown Refused
11. Do you have a mental health disability that limits your ability to work or perform activities of daily living? **Yes*** No Unknown Refused
12. Do you have an alcohol or drug problem that limits your ability to work or perform activities of daily living? **Yes*** No Unknown Refused
13. Are you currently living with HIV/AIDS? **Yes*** No Unknown Refused
14. Do you have a physical, developmental, or other disability that limits your ability to work or perform activities of daily living? **Yes*** No Unknown Refused

CHECK THIS BOX WHEN THE SURVEY HAS BEEN ENTERED INTO THE HMIS

Description of Person if Refused Survey:

Appendix 5: 2014 Overview

POINT IN TIME (PIT) COUNT January 2014 Overview

2014 PIT Count Dates:

- **Sheltered Date for the Count is Wednesday, January 22, 2014.** Individuals and families staying in a shelter on this night will be counted. All sheltered intakes for clients residing in your ES, TH, or SH programs should be entered into the HMIS by Friday, February 7, 2014. All Non-HMIS summary surveys for providers not participating in the HMIS (e.g. DV shelters) should be completed for clients residing on the night of 1/22/14 and submitted to carlosperaro@yahoo.com by Friday, February 7, 2014. This survey document will be sent to providers several weeks prior to 1/22/14.
- **Unsheltered Dates for the Count are Thursday, January 23, 2014 to Wednesday January 29, 2014.** ONLY people who responded that they DID NOT stay indoors on Wednesday January 22, 2014 should be surveyed. If a person responds by stating that they were sheltered or stayed indoors on the 22nd, discontinue the survey and **do not enter** it into the PIT module of the HMIS. Ideally, surveying should be done at a variety of times including very early in the morning and late at night. Feedings should also be utilized as sites for surveying. All unsheltered surveys collected during the date range above should be entered into the HMIS by **Friday, February 21, 2014.**
- **Kick-Off Evening is Thursday, January 23rd** from 5:00-9:30pm for a concentrated outreach effort in each of the regions, which will continue until **Wednesday, January 29th.**

Volunteers: Any assistance by students or volunteers during the week of the unsheltered canvassing will be greatly appreciated. **All volunteers must register prior to the count with their affiliated organization for their particular region.** Volunteers can be assigned to lead coordinators as needed; however, organizations are also encouraged to recruit volunteers to assist with their efforts. Regional lead coordinators and partnering organizations must make sure that all volunteers working in their areas are adequately trained, documented in the Volunteer Sign-Up Form, and sign the Contact and Confidentiality Form. There will be several trainings leading up to the count, one during the week of January 6th, and one during the week of the 13th.

Survey Instruments: The survey instruments for 2014 have been slightly modified to accommodate HUD changes and to capture information that will be helpful to the CoC. A copy of the household (accompanied) and single (unaccompanied) surveys will be provided. It is recommended that the form for singles be printed on white paper, the survey instrument for households be printed on colored paper. The household form contains a page for the head of household and a form that should be used for all other adults within the household. Each adult in the household should have a corresponding survey.

Training: There will be two trainings during January for Lead Coordinators, partners, homeless programs staff, and volunteers. One of the trainings will be conducted during the week of January 6th, and the other will be conducted during the week of January 13th. Training dates will be forthcoming. After initial training and instructions have been disseminated via training and telephone conversations, leads and partners are urged to conduct sub-trainings with volunteers to relay important coordination topics.

Surveyor Training: The last training for those working the Kick-Off Count will happen from 5:00 to 5:30 pm just prior to the start of the count at each of the coordinating sites. All surveyors are required to attend. All lead coordinators should help to ensure that all surveyors are properly trained before each shift.

Survey Data Entry: Data entry must be conducted by staff already established in the HMIS. Lead coordinators and partnering agencies will be responsible for determining which personnel will be

responsible for entering the surveys collected during the count. Instructions to aid in the data entry will be provided before 1/22/14.

Appendix 6: Contact and Confidentiality Form

Contact Information and Confidentiality Form 2014 HOMELESS POINT-IN-TIME COUNT**

Name: _____ Phone #: _____

Position: _____ Agency: _____

E-mail: _____

Emergency Name and Contact #: _____

Preferred Geographic Area: _____

2014 Point-In-Time Count Statement of Confidentiality MUST BE SIGNED BY ALL SURVEYORS

All outreach staff and volunteers associated with the collection of homeless population data during the 2014 Unsheltered Point in Time Count are subject to certain confidentiality guidelines.

These guidelines apply to all data collected during the seven day period from January 23rd – January 29th and to any data that may subsequently be entered into the HMIS from this period. The State of Hawaii's HMIS contains an appreciable amount of client information that must be confidentially maintained. As the administrator of the HMIS, there are several guidelines that the State of Hawaii would like to address regarding the upcoming collection of client data and the entering of this data into the HMIS for applicable outreach staff.

- All client information gathered will be held strictly confidential.
- All completed surveys will be kept out of public view.
- Personal HMIS user identifications and passwords will be kept secure and will not be shared.
- Private information obtained from the HMIS is to remain confidential, even if an employee's job is terminated or concludes for any reason.
- Entering known, inaccurate information about any client is prohibited.

**Your signature below indicates your agreement to
comply with this statement of confidentiality.**

Outreach Agency if Applicable _____

Print Name _____

Signature _____ *Date* _____

**Please email or hand-in all completed forms to the lead coordinator or partner agency. The lead coordinator/partner agency will be responsible for collecting all consent forms and submitting them.

Appendix 7: PIT Agency Instructions

AGENCY INSTRUCTIONS UNSHeltered Homeless Surveyors Instructions JANUARY 23rd to 29th, 2014 - HOMELESS POINT-IN-TIME COUNT

- Surveying begins on Thursday, January 23rd from 5–9:30 pm and will end on Wednesday, January 29th.
- Survey all unsheltered individuals and households that you normally outreach.
- Survey all unsheltered individuals and households that request services from you.
- If you have staff and volunteers assisting in the Kickoff Thursday or doing outreach during the week make sure it is coordinated with the agency or person who is the Lead for that area.
- Have all staff and volunteers that are helping with the survey fill out and sign the Contact and Confidentiality Form.
- Collect all Single and Household surveys and assign someone with access to the HMIS to enter the unsheltered surveys into the PIT module of the HMIS. Instructions for entering data into the HMIS will be provided before the PIT count takes place.
- Ensure that all staff and volunteers have been properly trained by someone who has attended the PIT Count training and reviewed the Surveyor Instructions handout.

Safety Tips

- Never survey alone – Work in pairs and always stay within eyesight of others.
- Never survey in an isolated area unless the area and the clients are known to you
- If there is an area that you do not feel comfortable surveying, do not survey and let the coordinator know that the area was not surveyed.
- It is recommended to wear white or brighter colors to be easily visible. Wear comfortable clothes and shoes. Limit the amount of accessories you wear.
- Look for any suspicious or dangerous activities when arriving at a site to be aware of areas to avoid.
- Be observant of people around you and look up often while administering the survey.
- Stay out of enclosed or tight spaces.
- Do not pressure anyone to participate in the survey
- In case of an emergency, call or have another person call 911.

Appendix 8: Additional 2014 PIT Count Instructions

PIT COUNT 2014 - ADDITIONAL INSTRUCTIONS

INTERVIEW SURVEY: (front side)

Site of Interview (Actual Location):

If this is an office location please denote as such *Example: U.S.VETS (Office)*
This will allow distinction between interviews completed “on the streets” versus office.

1 and 2) First/Last Name – VERY IMPORTANT TO COMPLETE. NECESSARY TO LINK TO HMIS

5) What race do you identify with?

Filipino should be categorized with “Other Pacific Islander”- due to limited categories

ENCAMPMENT QUESTIONS: (back side)

These questions are added for three main reasons: 1) Public Health documentation, 2) Census of large encampments, and 3) Information to strategize for housing alternatives

1) Encampment Description:

On-site visual = completed at their site (by yourself or with the person’s assistance)

Office setting = completed at office or other place not at site – person answers questions to the best of their ability since visual is not available

Unable to complete = circumstances do not allow while on-site. Please minimize use of this response. Office setting should be able to complete with person

2) Size of encampment:

No measurements needed. Choose the best approximate size.

6 feet by 6 feet - is the size of one person (squared). The site is no more than one person with minimal set-up then choose this selection.

12 feet by 12 feet – this means bigger than 6 x 6 – but no bigger than approximately two persons by two persons square (e.g. two tents, one small car set up).

Greater than 12 x 12 feet – large multi-person encampment, or large tent structure.

3) Is Encampment area protected from rain?

Use your best judgment if you think it sufficiency protects full body from rain.

Sufficient – Blue tarp (not tattered), solid tent, car, construction material roof

Insufficient – Cardboard, sleeping blanket only, small vinyl that doesn’t fully cover

4) What materials are used for encampment?

Please go through each one and check if applies. Please add additional as viewed short comment/description. It is expected that most encampment use 1 or more materials. **Please be courteous.** Most are willing to help with visual.

5) Animals? – Self-explanatory. This question you can ask when likely, but no visual.

6) Accessibility?– this is from the interviewers/outreach worker’s point of view.

Easy (Street/park) – examples: sidewalk, urban park areas, in from of buildings.

Moderate (off path) – location not visible from inside a car (park areas hidden).

Somewhere that takes more than 5-10 minutes to get to from street.

Difficult/dangerous - area would not go alone or inexperienced worker (cave, deep in bush in known dangerous area due to crime/drugs)

7) Single person encampment? Self-definitive

ANALYSIS OF PIT 2013

PIT 2012 performance = 85%; PIT 2013 performance = 79%
 GOAL PIT 2014: of 90% for 2014.

Table 2: Prevalence of Full Name Collection in the 2013 Oahu PIT Count

Area	Total Count	# Full Names Collected	# Missing Names	% With Full Name
1	590	398	192	67%

Appendix 9: Preparation for the 2014 PIT Count

Preparation for the 2014 PIT Count

Background:

The analysis of the PIT count completed by Carlos Peraro and Michael Ullman showed a significant amount of discrepancies between individuals active in the HMIS and the actual canvassing efforts. PIC is asking agencies, especially outreach agencies, to prepare better for the 2014 PIT count in order to produce a more accurate count.

The key strategy introduced this year will be for *outreach agencies to use their HMIS active lists as the basis for clients they should be finding and enumerating during the canvassing period*. The steps below will help in this preparation. In order for the PIT count to improve, outreach agencies must set higher standards for the whereabouts of the clients that they are serving as indicated by being active in their HMIS records. All PIC agencies will support the efforts of the outreach agencies during the canvassing period.

Key Preparation Steps:

1. Outreach agencies should first print out their active lists from the HMIS. The best function to produce a list that gives the name, intake date, and last encounter date is the “Veterans Total Report” under REPORTS menu. Select the report and select “client names”. This report was created and paid for by U.S.VETS last year to track veterans, but it can list all names with the veterans being designated by an asterisk.

Select the date range. It is recommended to use 12/1/2013 thru 12/1/2013 as the date range (one day). Copy and paste the listing into an excel sheet and sort by last name ascending and, on separate tabs, sort by intake date, and by encounter date.

A sample of the report is attached on the last page of this document

2. The report produced above should be used to begin “cleaning” your HMIS active list. The month of December and into early January should be used to clean the active list and delete/close out cases that are not active with your outreach program. You will be asked to print a final list on January 1, 2014, using the same report techniques.
3. It is recommended to close out cases for the following obvious reasons:
 - a) No encounter in the past 90 days. This list can be obtained by sorting on last encounter date as described above. Exit information should be as accurate as possible, but lack thereof should not preclude closeout. Use the date of the last encounter as the exit date.
 - b) Currently housed. Some outreach programs engage housed/sheltered individuals. If they are still receiving services, these clients should be put into a separate HMIS program that is not assumed to be unsheltered. The same closeout procedures apply if sheltered clients

are no longer receiving services. Contact Carlos Peraro, and he can assist you in setting up the sheltered outreach program in the HMIS and transferring those clients into that program.

- c) Duplication. Please merge any duplicate entries. If the system will not allow you to merge, please send to Carlos Peraro to merge the individual's intake records into one client file.
- d) Efforts should be made to obtain consent from clients with aliases, and if gained, the alias should be edited to the actual name. It should be noted that implied consent is acceptable for entering actual information into the HMIS. This is an acceptable practice, confirmed by national HUD TA providers.
- e) Errors in the designation of individuals' current homeless status.

ALL INDIVIDUALS REMAINING ACTIVE IN YOUR HMIS UNSHELTERED OUTREACH PROGRAM SHOULD BE CONFIRMED AS LITERALLY HOMELESS.

Next Steps – General Overview of the 2014 PIT effort.

1. The revised listing as of January 1, 2014 will be considered your agencies ACTIVE list of unsheltered homeless persons for the 2014 PIT count.
2. Canvassing efforts during January and up to the PIT Count will focus on finding ALL THE PEOPLE ON YOUR ACTIVE LIST and documenting their current homeless status and location of unsheltered encampment. This should aid in more effectively targeting unsheltered homeless during the 2014 PIT Count.
3. Beginning December 1, agencies should work to update as much information for active clients as they are encountered in normal outreach duties to further clean and update the information in the HMIS. Please begin updating actual location information through encounters so that ALL ACTIVE CLIENTS CAN BE FOUND (or have a high probability of being found) during the PIT Count period. Additional strategies to accomplish this will be discussed in meetings. Information to clients regarding the upcoming PIT count should begin being disseminated as soon as possible.
4. Persons who were active but were not found during the PIT period will be exited in your program with an exit date of one day prior to the PIT date. This will mean that the HMIS outreach section will show only PIT count persons as active on the PIT count date.
5. Persons can be reopened in your program, as you encounter them, beginning on the 8th day after the PIT date. This will ensure that the full week of the canvassing period contains only PIT HMIS people.

Thank you for your participation in the upcoming Oahu PIT 2014.

Darryl J. Vincent, PIC Chair
