## Overview

The Hawaii 2020 APSR Data Booklet is an integral part of the 2020 ASPR. The figures contained in this booklet are referenced throughout the 2020 APSR, and provide detail and graphic representation of the relevant data. Although there may be occasional clarifying notes following the figures in this booklet, it is recommended that the data in this booklet be reviewed along with the accompanying narrative in the 2020 APSR for proper context and a more complete understanding.

The data contained in this booklet was gathered from internal DHS sources, community stakeholders, partners, and contracted providers, then compiled and presented in these figures to help inform the reader.

The Child Welfare Services database, Child Protective Services System (CPSS), was the source of much of the data. Within CPSS, data does not remain static, rather it will experience some temporal flux due to the addition or modification of data following the extraction of data for a report. The data extracted farther from the time period being reported is usually more stable than data extracted closer to the report period. Please consider this as you encounter discrepancies between the data in this booklet and other historic data reports.

### Extraction and reporting protocols:

- Hawaii's State Fiscal Year (SFY) begins on July 1 and runs through June 30 of the following year.
- Child's age is calculated as of the last day of the report period if the child is still in care or receiving the service being reported, or at the date of exit from foster, or at the date of a specific event, *e.g.*, adoption or award of legal guardianship, depending on the information being reported.
- Child's age is reported in years, as an integer, *e.g.*, age 0 includes birth to the day before the child's first birthday, age 1 includes the first birthday to the day before the child's second birthday. [0.0 through 0.99 = 0, 1.0 through 1.99 = 1]
- Counts of children in care and recipients of services/benefits:
  - Monthly average, or more accurately average monthly, data looks at the total count for each month and then combines and averages the total over 12 months. This provides a more realistic measure/approach to service needs and capacity. Individuals are unduplicated within a month, but might be duplicated in the total of all months.
  - Annual count, used in reporting per SFY, is an unduplicated count of all who received that service during the stated year.

Figure 4: Factors Precipitating Incident for Confirmed Victims SFY 2018 [Table]

FACTORS PRECIPITATING INCIDENT - SFY 2018		
<p>The Factors Precipitating Incident are conditions that were identified as contributing to the abuse or neglect of the child. Up to six (6) factors may be indicated per report. In SFY 2018, reports on 1,202 children were confirmed. All factors indicated in those confirmed reports have been included in this table.</p> <ul style="list-style-type: none"> <li>• The “Children” column indicates the number of children for whom this factor was reported.</li> <li>• The “Percent” column percentage is based on the total number of confirmed victims, and the number of victims with this factor (children for factor/total number of children =%).</li> <li>• Since more than one factor may be indicated per victim, the children and percentages will add up to more than the total number of confirmed victims and more than 100%.</li> </ul>
